

Weekly Coal Production

Production for Week Ended:
October 17, 1992

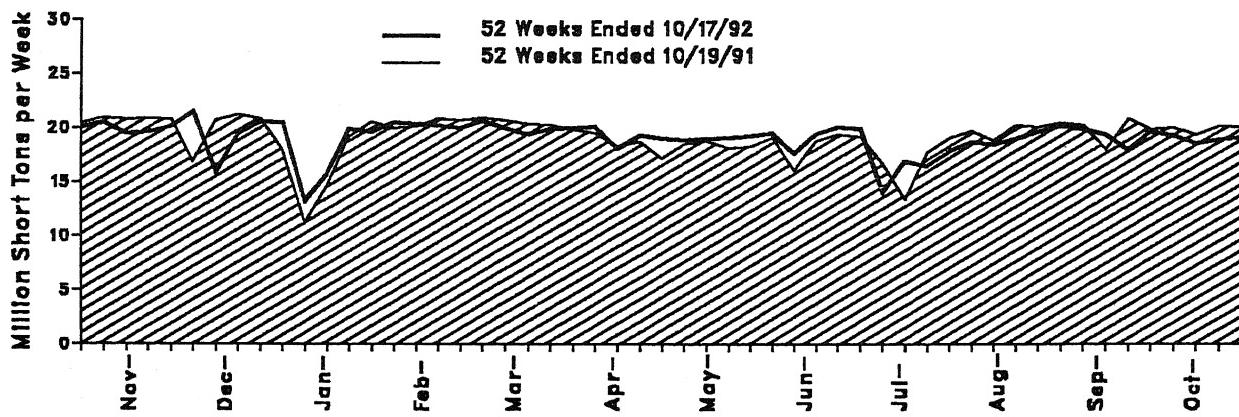

Summary

U.S. coal production in the week ended October 17, 1992, as estimated from railroad car loadings by the Energy Information Administration, totaled 19 million short tons. This was about the same as in the previous week but 5 percent lower than in the comparable week in 1991.

Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 8 million short tons.
